## So how does it work?

If you're at a restaurant, you'll want to show the waitstaff your offer before they total up your bill—like when you order, let them know you've got it so they don't have to do extra work by re-doing your bill. Don't be that guy!

For pay-at-the-register kinds of places, just show them your phone when you're paying and BOOM! You're a savings champ!

Here's how you redeem on your device:

1. Find the offer you want to use (it might be in your Buxbo wallet already!)
2. Tap **Use Now** when you are ready to use it.
3. Tap the **YES** button (duh) and show your phone to the nice person who's ringing you up!

Just make sure that both you and the merchant are ready because once you tap that **YES**, your offer will expire in 10 minutes...so get on that train before it leaves the station!
